Your Future
Your Language
Your Choice

Going to university in Wales? Choosing where and what to study is a big decision but don’t worry – this prospectus is here to help you make the right decision.

The Coleg Cymraeg’s prospectus shows which courses you can study partly or fully through the medium of Welsh in every university.

It also offers information on the support available to Welsh medium students, the advantages of studying a subject through the medium of Welsh and outlines the experiences of students who are attending universities throughout Wales.

How can the Coleg help you?

The Coleg can help you by:

• Developing Welsh language courses in partnership with every University in Wales
• Offering scholarships to students who want to study through the medium of Welsh
• Funding Welsh medium provision in eight universities
• Creating useful resources for Welsh medium students
• Arranging a period of work experience and an opportunity to receive the Welsh Language Skills Certificate

You can meet us in a variety of places including:

• UCAS fairs
• Public events such as Eisteddfodau
• Open days at the universities
• Visits to schools and further education colleges
Why study through the medium of Welsh at university?

There are a number of advantages to choosing to study a University course partly or fully through the medium of Welsh:

- An opportunity to receive additional funding
- Be a part of smaller groups
- An opportunity to develop specialist terminology in two languages
- Develop bilingual skills which will be beneficial to you when looking for a job in the future
- On average, bilingual job salaries are higher

What support is available?

If you don’t feel confident enough to study a course fully through the medium of Welsh, there are plenty of courses available which give you the option to study part of your course through the medium of Welsh.

There is support available for students who study courses partly through the medium of Welsh to help them improve their oral and written language skills.

Two languages – twice the choice

You can study nearly 1,000 courses partly or fully through the medium of Welsh at these universities:

- Swansea University
- Aberystwyth University
- Bangor University
- Cardiff University
- University of South Wales
- Glyndŵr University
- Cardiff Metropolitan University
- University of Wales Trinity St David

There is also some Welsh medium provision on courses offered by the Open University and courses in further education colleges.

I decided to study part of my course through the medium of Welsh as it provides me with a great opportunity to develop my skills of working bilingually in preparation for the workplace.

Psychology
Bangor University
Skills for the workplace: Planning your career

Studying through the medium of Welsh provides a great opportunity to prepare you for the workplace. The Coleg has a number of schemes that can assist you in planning your career:

**Work experience**
If you receive one of the Coleg scholarship, you will go on a 10 day period of work experience where you will be given an opportunity to consult with employers from all sectors in Wales and beyond. Students who have undertaken an element of work experience are paid, on average 20% more and are much less likely to be unemployed after graduation.*

**Bilingual employers network**
The Coleg works with over 200 employers to offer interesting and varied work placements for students.

> During my period of work experience I had a taste of what it was like to work in a friendly and professional Welsh environment. I witnessed meetings between senior managers from the local social services department where I saw the importance of professional communication skills as well as the need to consider various perspectives. My work experience taught me that there is much more to consider when making career decisions – a valuable lesson for the future.

**Elain Angharad Jenkins**
Mathematics student
Swansea University

Money in your pocket

The Coleg Cymraeg Cenedlaethol offers financial support to prospective students who want to study courses partly or fully through the medium of Welsh.

Have you considered applying for one of the Coleg’s scholarships?
There is up to £3,000 available over the duration of the course to students who are either studying at least 66% or 33% of the course through the medium of Welsh.

Go to colegcymraeg.ac.uk/scholarships for more information.

How do you apply?
• Go to the Coleg’s website, colegcymraeg.ac.uk/scholarships
• Join the Coleg as a prospective student free of charge
• Read the application pack
• Submit your application form by the closing date

Over 1,000 students have benefited from receiving a scholarship from the Coleg Cymraeg Cenedlaethol over the past few years.
You don’t need to pay the money back so why not give it a try?

William Salesbury Scholarship

Total: £5,000 over the duration of the course
Who: Students who study 100% of the course through the medium of Welsh
Number: 2 per year
Closing Date: 20 March 2019

Nest Jenkins has been awarded the William Salesbury Scholarship of £5,000 and studies Law and Welsh at Cardiff University:

What were your reasons for applying for the William Salesbury Scholarship?
I was aware of William Salesbury’s special history and had heard about the fund. When researching the scholarship, I learnt that it was possible to study my subject fully through the medium of Welsh and that I was therefore eligible to apply. It was too good an opportunity to miss; raising awareness of Welsh medium education provision and receiving valuable financial support at the same time!

How are you finding Cardiff and the course so far?
I love being in the midst of all the hustle and bustle. I find my course, Law and Welsh, challenging but exciting and I’m eager to learn more throughout the year. Despite the work, it would be impossible not to socialise whether that be with the GymGym or as one big happy family in Senghenydd Court halls of residence.

Your reaction to winning the scholarship?
Couldn’t believe it! It’s a well respected and competitive scholarship and therefore it’s an honour to receive it this year.

How are you finding Cardiff and the course so far?
I am keeping my options open but I am determined to stay in Wales and work in my mother tongue.
Welsh Language Skills Certificate

If you receive a scholarship from the Coleg Cymraeg, you will study towards the Coleg’s Welsh Language Skills Certificate during your time at university. The qualification gives students a further boost and allows them to increase their confidence and level of ability in the language.

What is the certificate?
• A qualification which proves to employers that you have the ability to communicate confidently and professionally in Welsh, orally and in writing
• An opportunity for you to develop your oral and written skills in Welsh

What will you have to do?
• Receive support and advice from your university’s language skills tutor
• Pass an oral and written assessment before completing your university studies

Nearly 1,000 students have already taken advantage of this excellent opportunity to gain a qualification which highlights their language skills.

I study as much as I can through the medium of Welsh – by making notes and attending sessions with the university Welsh tutor I can continue to use my written and oral skills on a daily basis.

The opportunity to study towards the Coleg’s Welsh Language Skills Certificate is also very important as it is a qualification that shows that I can work bilingually.

Hanna Lois Jones
Sports Science student
Bangor University
Enjoying Life

By studying through the medium of Welsh at a university in Wales, you will become part of an exciting Welsh Language Scene. There are plenty of opportunities for you to meet new friends, join various societies and experience the wealth and variety of Welsh communities and beyond.

Want to know more about the life of Welsh medium students in Wales? The Coleg’s ambassadors have created a ‘Llais y Llysgeinad’ blog which describes their life as a student at universities across Wales.

Read the blog or follow #LlaisLlysgeinad on Twitter
www.blog.colegcymraeg.cymru

One of the things I enjoy most about life at University is socialising and being part of a society. It gives me a great opportunity to make new friends as well as helping individuals with their Welsh-student life at a Welsh university is great.

Dylan James
One of the Coleg Cymraeg ambassadors
Aberystwyth University
Branches

The Coleg Cymraeg has a branch at every university. The work of the branches includes:

- **Increasing the opportunities available to students to study university courses through the medium of Welsh**
- **Supporting students who study through the medium of Welsh and arranging social activities**
- **Offering an opportunity for Welsh medium students and staff to voice their opinions on Welsh medium issues at their university**

Read more about every university on the next pages.
Swansea University branch

Swansea University’s aim is to ensure that our students have the best of both worlds, Welsh and Welsh language experiences at a university which has multicultural and international connections.

The Swansea University branch of the Coleg Cymraeg Cenedlaethol is based at Academi Hywel Teifi, which is the University’s centre for supporting, enhancing and enriching its Welsh medium education and research provision.

One of Swansea University’s main strengths is Science, and there is significant Welsh medium provision in subjects such as:

- **Physics**
  There are two Physics degree courses – BSc (3 years) and MPhys (4 yrs), that are taught bilingually.

- **Engineering**
  With a great demand for engineers and more jobs than there are engineers, engineering graduates can walk straight into well paid jobs. But, by demonstrating abilities in more than one language, Swansea graduates have the upper hand in a competitive world of work.

- **Genetics and Biochemistry**
  One of the most recent developments in our provision is Genetics and Biochemistry modules through the medium of Welsh. As a result, our degree courses in this field are eligible for Incentive Scholarship, and our hope is that this will attract more students who will meet the demand in this field for graduates with both Welsh and English language abilities.

By studying at Swansea University you will become a part of an ambitious organisation which produces world class research. You will experience our 5* rated teaching with an emphasis on employability, and you will be sure to fall in love with the city.

If you wish to live with other Welsh speakers, there are flats available for Welsh speakers and learners on both campuses. There is also a lively Welsh language society and Clwb Chwaraeon Tawe for Welsh speakers.

There is extensive Welsh medium provision across a range of subjects at Swansea, including science subjects such as Medicine, Geography and Mathematics; care and health sector subjects, including Midwifery, Nursing and Social Work; plus courses in Humanities and the Arts in fields such as Law, Modern Languages, Welsh, and also Media and Public Relations.

There are over 30 courses eligible for the Main Scholarship and over 60 courses eligible for the Coleg’s Incentive Scholarships.

Come and join us at our Open Days, where you can meet our staff and students and see for yourself what Swansea University has to offer.

We look forward to welcoming you to Swansea University.

Swansea University
‘Addewidion Aber’, a card given by the University to every student who studies through the medium of Welsh, shows how the University is committed to providing a complete Welsh experience to its students. There are six promises:

- **Flexible opportunities to study through the medium of Welsh in all departments**
- **Guaranteed Welsh-speaking personal tutor**
- **Bilingual work experience**
- **Guaranteed Welsh medium accommodation**
- **Lessons to learn and improve Welsh**
- **Free membership of Aberystwyth’s Union of Welsh speaking students**

As a result of the academic and pastoral support available in Welsh at Aberystwyth, the experience of Welsh speaking students at the University is second to none. Our students come from all parts of Wales, and central to the lively social scene is Aberystwyth’s Union of Welsh Speaking Students (UMCA) which organises social events and takes cares of its members’ welfare.

Contact the Aberystwyth University branch for further information:

aberystwyth@colegcymraeg.ac.uk

The University’s Coleg Cymraeg Branch is a lively community of staff and students that meet regularly in committees that shape the University’s Welsh medium provision, in lectures and research seminars, and at less formal events such as poetry slams, quizzes and gigs.
Bangor University offers more courses and opportunities to study through the medium of Welsh language than any other university in Wales. From the sciences to the arts, there are a variety of courses offering the opportunity for students to study either partially or entirely through the medium of Welsh. Consequently, more students at Bangor University choose to study their course through the medium of Welsh than anywhere else.

Bangor University offers linguistic support to help students develop their written and verbal Welsh language skills, and a Welsh Medium Bursary (£250 a year for studying 40 credits a year though the medium of Welsh) is also available.

Situated within naturally Welsh-speaking Gwynedd, the Welsh language is an integral part of life at the University. The Welsh language halls of residence, John Morris-Jones Hall, provides a particular opportunity for students to live in a completely Welsh-speaking environment.

With so many Welsh speakers and learners choosing to study here, we offer a fantastically lively social scene. The main focal point of this activity is Bangor’s Welsh Students Union (UMCB), which organises a number of social activities through the medium of Welsh.

Bangor University Branch of the Coleg Cymraeg Cenedlaethol is based at Canolfan Bedwyr. It’s a central and convenient location, and students are welcome to drop by for a chat, or to ask staff about any aspect of studying through the medium of Welsh at Bangor. Facilities include the Coleg’s video conferencing studio, developed specifically for teaching modules jointly with other universities. The branch also works closely with UMCB, to promote the Coleg’s activities.

Contact the Bangor University branch for further information: bangor@colegcymraeg.ac.uk
Cardiff University and the Coleg Cymraeg Cenedlaethol bring Welsh speaking students (first language speakers and learners) together through a variety of activities.

One of the first things that you’ll do after arriving at the University is join the ‘GymGym’ the Welsh language society. The GymGym organises activities such as the annual Inter-university Eisteddfod, rugby trips and works closely with the branch to arrange various social events.

The branch plays a prominent role in developing Welsh medium provision within the University, and students are given the opportunity to take part in academic meetings to express their views on that provision.

Cardiff University attracts a large number of Welsh speaking students from all parts of Wales. Living in the capital certainly appeals, in addition to the wide choice of courses that are unique to the University, especially in the field of Health.

Among an extensive range of subjects, the University specialises in its Medicine, Dentistry and Journalism courses, and Welsh speaking students are attracted here in large numbers to study these. There have been plans recently to develop Welsh medium provision within these subjects.

For instance, at the School of Healthcare Sciences, there are many degree courses, including Adult Nursing, that include Welsh medium modules. In addition, Welsh medium provision will be developed in Physiotherapy, Occupational Therapy and Radiography, among other fields.

If you wish to live with other Welsh speaking students, there are flats at Senghennydd Court and Talybont North which are allocated for Welsh speakers and learners.

Contact the Cardiff University branch for further information: Caerdydd@colegcymraeg.ac.uk
The University of South Wales is Wales' largest university with campuses in Cardiff, Newport and Pontypridd.

These unique locations mean that you can enjoy everything that the region has to offer; the life and culture of the capital, fantastic beaches and magical countryside. The University offers various opportunities for you to study through the medium of Welsh.

The Cardiff Campus is home to the creative industries, and the ATRiuM building’s recent extension means that more specialist creative resources are available for students to develop their craft. It is possible to study 100% of the Drama course through the medium of Welsh, and bilingual pathways are available on our Media and Music courses. Creative industries students at the University benefit from our excellent links with the industry, with well-known theatres, studios and companies on our doorstep.

In Pontypridd, which is only ten miles away from Cardiff, the University has two sites; Treforest and Glyntaff. The Pontypridd campus is ideal if you prefer a quieter place to study, as there are many green open spaces and plenty of fresh air. At the Treforest Campus, you can study a considerable part of our Surveying, Business and Police Sciences courses through the medium of Welsh, and take advantage of excellent facilities, including the ‘Hydra’ Room which is used to train police officers at all levels.

The City of Newport Campus is located on the bank of the River Usk in the centre of the modern city with a bright future. For those who wish to follow a career in primary school teaching, it is possible to study our Primary Studies course with QTS through the medium of Welsh. Students on this course benefit from our excellent links with local schools in addition to first class facilities such as our teaching simulation laboratories.

By choosing to study part of your course through the medium of Welsh, it is possible you will be eligible to receive a scholarship from the University and the Coleg Cymraeg Cenedlaethol. There are also numerous opportunities to use the Welsh language outside your academic studies. The University of South Wales branch of the Coleg Cymraeg Cenedlaethol organises a series of social events during the year in collaboration with the Welsh language society, the ‘GymGym’. Recent events include a trip to a trampoline park and a comedy night.

You can find more information about the Welsh language opportunities available by visiting www.decymru.ac.uk/cymraeg-de-cymru or by e-mailing: cymraeg@decymru.ac.uk
The University works closely with the Coleg Cymraeg Cenedlaethol to develop and extend Welsh medium provision. We are committed to offering greater choice to students who wish to study here through the medium of Welsh.

As a university, we strive to provide you with numerous opportunities to study and socialise through the medium of Welsh.

The University has established a branch of the Coleg Cymraeg Cenedlaethol with a dedicated officer to support those students who wish to use the Welsh language in their academic studies.

As a Welsh speaking student at Glyndŵr University, you can join the Coleg Cymraeg Cenedlaethol. As a member, you will be offered the following:

- Support from the members of the branch regarding any aspect of Welsh medium education
- Access to a wealth of resources on Y Porth (the Coleg’s e-learning platform) and you can also access Welsh medium resources in a variety of academic fields
- The opportunity to work towards the Coleg’s Language Skills Certificate, developed by the Coleg to recognise the importance of students’ Welsh language skills. The certificate demonstrates your ability to communicate confidently and professionally, both written and verbally, in Welsh
- The latest news regarding scholarships, conferences, opportunities and activities offered by the Coleg

You can also become a member of the Coleg as a prospective student, which will give you access to information about opportunities to study through the medium of Welsh.

There will be plenty of opportunities for you to improve your Welsh or learn the language if you wish.

Contact the Glyndŵr University branch for further information:
glyndwr@colegcymraeg.ac.uk
@Cangen_Glyndwr
Cardiff Metropolitan University branch

Located in the capital, Cardiff Metropolitan University is a modern, lively university that has been a fundamental central point of Cardiff for over 150 years. The University focuses on ensuring the best possible student experience, employability and education of the highest standard to students from Wales and 140 countries from across the world.

The university offers education through the medium of Welsh across all five of its Academic Schools:

Cardiff School of Education
- Recognised as one of the largest education and training providers in Britain
- Primary, secondary, Early childhood studies, education, educational studies and Welsh courses are available either partially or entirely through the medium of Welsh

Cardiff School of Sport
- International reputation for the standard of its academic, research and performance work
- At least 1/3 of every undergraduate course is available through the medium of Welsh, and some courses are available almost entirely through the medium of Welsh

Cardiff School of Art & Design
- Produces stand-out graduates in the fields of fine art, design, architecture and a number of practical crafts
- 1/3 of every undergraduate course is available through the medium of Welsh

School of Health Science
- Offers Health Sciences and Social Care courses, a number of them unique to Wales
- Parts of the Therapy, Language and Speech course are available through the medium of Welsh to prepare graduates to work through the medium of Welsh

 Management School
- Offers courses that have been designed specifically to produce graduates that are prepared for today’s world of work
- 1/3 of 18 undergraduate courses are available through the medium of Welsh
- Welsh language provision available on Management, Tourism and Events Management courses

Ensuring the Employability of our students
Through work experience, links with professional bodies and student entrepreneurship, 96% of our graduates are in employment or further study within six months of graduation.

Contact the Cardiff Metropolitan University branch for further information:
diplady@cardiffmet.ac.uk
The Trinity Saint David branch of the Coleg Cymraeg Cenedlaethol is active across all the University’s campuses including Swansea, Lampeter, Cardiff and the Coleg Sir Gâr campuses. The office is home to the Branch Officer and the Language Tutor and branch members, whether students or members of staff, are welcome to drop by for a chat and seek advice and information at any time.

The University has invested considerably in Welsh medium and bilingual provision over recent years, including in the areas of Art & Design and Business and Tourism on Swansea campuses, as well as in various areas such as Teacher Training, Physical Education, Outdoor Education, Early Years Education and Care, Primary Education Studies, Youth and Community Work and Religious Studies in Carmarthen. One notable recent development is the BA Performing course in Cardiff which offers an innovative two year degree programme in close partnership with experienced practitioners from the creative industries in Wales.

With S4C’s Egin building being developed on the University’s Carmarthen campus during 2017/18, the University intends to work with some of the clients to develop new bilingual degree courses which will meet the demands of the creative and digital industries in the future.

A high percentage of Trinity Saint David’s Welsh medium and bilingual courses are part of the Coleg’s Scholarships Scheme. In addition to this, the University offers students the opportunity to apply for a bursary of up to £600 a year for studying part of their degree course through the medium of Welsh.

The students themselves are responsible for co-ordinating the University’s Welsh language society, and various social activities and events are organised, from international rugby trips and sporting competitions to annual dinners. They also take part in the Inter-university Eisteddfod.

Côr y Drindod Dewi Sant has enjoyed considerable success at Wales’ eisteddfodau over the years and there’s an opportunity to take part in a number of concerts and events each year.

In addition, a Students’ Committee has been formed by students of the branch, and the committee organises various activities that enrich the student experience across all the University’s campuses.

I decided to study part of my course through the medium of Welsh as I strongly believe that it is very important for young Welsh people to use their language in the workplace and it can open so many doors for you.

Gwenllian Owen
Law student
Cardiff University
For all sorts of reasons, it is an extremely exciting time to study the Welsh language. The Welsh Government have set a target to double the number of Welsh speakers by 2050; there is a lively and active literary scene that challenge boundaries; newer forms of the language are developing around us; and the relationship of the language and technology is steaming ahead.

It is not surprising therefore that there is more demand than ever for Welsh language graduates to lead in these areas. Would you like to be one of them?

In pursuing a degree in Welsh you will study a subject that combines the linguistic, literary and creative.

- **Language** – you will understand and appreciate the sociology and history of the Welsh language and how we should plan its future. The lecturers will help you with grammar and with communication and presentation skills in Welsh. They will encourage you and help you gain confidence. Perseverance and hard work pays off... keep at it!

- **Literature** – you can analyse the work of our poets, writers and dramatists from the sixth century to the present day.

- **Creative writing** – you will get guidance on composing prose, scripts and cynganedd. Who knows, you might one day win the Eisteddfod chair or crown.

**Welsh for the workplace**

You will receive training in the use of language for the professional world, e.g. how to prepare a CV in Welsh, and how to prepare for interviews; you will also have the advantage of work experience.

There are a variety of teaching methods: lectures, seminars, workshops and individual tutorials.

Assessment methods include a combination of essays, exercises, projects, examinations and oral presentations.

Lecturers and other members of staff can help you with the transition between learning and studying Welsh at school and at university.

Perhaps you are also interested in other Celtic languages such as Breton or Irish, or you might like to learn more about the Welsh abroad in Patagonia or America.

A degree in Welsh will prove you have the ability to express yourself effectively and purposefully in writing and orally.

All this will expand your horizons and your knowledge of Wales and the Welsh language will be valuable for you when applying for posts in Wales.
A number of historical areas can be studied through the medium of Welsh, from Welsh History to British, European and North American History. In addition, there will be opportunities to study Historiography, which is the study of how History is studied and used.

Studying History can be a method of fostering analysis, summarizing and writing skills – it is a subject very popular among employers.

**The subject is held in high regard by employers in posts within journalism, the media, research, political lobbying, tourism, teaching and museums.**

History appeals to employers not only because of the skills you will gain but also the fact that studying the subject will expand your horizons.

In studying History, you will develop the ability to weigh up facts and to develop independent opinions, together with developing an appreciation of the importance and significance of various historical sources.

Your ability to deal with topics objectively and in a balanced manner will be valuable in any career, and will be an advantage for you when coping with everyday challenges in the workplace.

The Coleg Cymraeg offers a number of progressive means of enriching the learning experiences of students of History.

In addition, several collaborative modules are offered which give students the opportunity to study part of their course under the guidance of other experts from many universities in Wales.
Understanding the world’s religions is an integral part of understanding our culture and wider society.

In studying for a BA in Religious Studies, you will come to understand religions such as Judaism, Hinduism, Islam, Christianity, Sikhism and Buddhism, in their cultural, social and historical contexts.

Throughout the course, you will gain an understanding of the dynamic relationship between religion, society and culture, by examining religion’s role in the most important questions of our time.

Religious commitment, history and identity will be examined in detail, in the context of contemporary events of global importance.

The practices and beliefs of the world’s major religions can be studied, as well as other traditions such as native religions and new religious movements. Different approaches to the study of religion will be introduced, with particular attention to the place of religion in the modern world.

There will be an opportunity to visit local and national places of worship, to go on overseas trips to centres of religious significance, and to foster a practical knowledge and a personal understanding of the world’s cultures and religions.

A degree in religious studies can lead to a career in several areas, including:
- Social services education
- International charitable and support organisations
- Tourism
- Media
- Politics
- Civil service
- Publishing
- Journalism
There are various methods of studying film, which are gaining in popularity. You can focus on the operational and practical side or the academic and analytical, or why not combine the two?

You can study different aspects of specific films, from the script to the camera work, the lighting to the editing.

You’ll have the opportunity to trace the progress of individual directors or schools of directors in a global context, and follow the development of different traditions based on western and eastern native cultures.

A degree in Film Studies can lead to a variety of jobs, including creative freelancer, working on specific productions or pursuing an academic career by specialising in a particular historical or contemporary genre.
Over the years, Drama and Performance has been one of the most popular subjects for Welsh medium study, and studying the subject now gives you the opportunity to interpret many different aspects.

The courses give you the opportunity to explore the practical and theoretical aspects, and often you can choose to focus on a specific aspect of a practical or theoretical position.

There are practical sessions and classes on playwriting, various approaches to performing, directing and producing, as well as theatre design and technology. You’ll also be given the opportunity to study textual drama, the history and development of the theatre alongside its social and community role, as well as various aspects of the theatre throughout the world.

In recent years, the Coleg Cymraeg Cenedlaethol’s collaborative opportunities in this area have included scriptwriting modules, a play reviewing course, a student conference, along with a Theatre Directing course.

This year, Wales’ Drama and Performance students will participate in MAP (Students! Innovation! Performing!!), the Coleg Cymraeg Cenedlaethol’s theatre festival, which will allow you to showcase your work on a national stage.

After graduating, you can go on to work as a freelancer or as a member of a permanent or touring company, whether as a writer, screenwriter, actor, director or producer. Your bilingual skills will also mean you can work in Welsh or in English, which will double your opportunities as you embark on your career.
Media

This is an exciting subject that is very popular among students. The Media covers a wide range of areas, such as television, radio, online and digital media, as well as the creative industries in general.

University media courses make the most of opportunities to create links between academic study schemes and the profession. You can specialise in specific areas such as scriptwriting and performing, technical skills such as camera operation and editing materials, as well as studio production or on-location programmes. You’ll also have the opportunity to familiarise yourself with the main academic challenges of this field, including professional review and textual analysis in a wide cultural and historical context.

Media graduates can choose to use their bilingualism in the Welsh media, or choose to work beyond Wales.

Those studying media through the medium of Welsh have a valuable advantage in an industry in which the language plays a vibrant part.

You can choose to specialise in a number of areas, freelancing or working as one of the following:

- Artist
- Musician
- Scriptwriter
- Animator
- New media expert
- Sound and lighting technician
- Electronic engineer
- Director
- Producer
Journalism

Do you have what it takes to be a journalist? Are you interested in the who, the where, the why and the how? Do you want to know where every good journalist gets their stories, and learn how to write them?

By studying a degree in Journalism, you’ll learn the answers to these questions. Firstly, you’ll learn what a news story is, before going on to develop the ability to analyse and interpret it. You’ll be given the opportunity to consider the effects of social media on mass media, and to consider the future of the journalism industry.

Journalism is a modern and exciting subject. By learning a wealth of practical skills, you’ll be guided towards a distinguished career, and there is clear demand from employers for students who have the ability to work as a journalist in Welsh and English with confidence and skill.

Your degree can also lead you to a number of other career paths, e.g. marketing, online social media management, broadcasting, writing for magazines, as well as working in public relations.
Public Relations

Every organisation, regardless of its size and role, depends on its reputation in order to ensure its continuing success. Public Relations is a specialised field that aims to understand the objectives of specific organisations – and to provide them with support – through strategic use of various communication methods.

Experts in public relations strive to maintain goodwill and understanding between an organisation and its audiences, including current customers and potential customers, employees and managers, investors, the media, government and suppliers. From preparing press releases to protecting the brand effectively, support can be secured for the organisation in question as well as recognition for its work.

In studying for a degree in Public Relations, you will have a challenging and exciting educational experience. By combining theory and practical activities, the course will give you the opportunity to master the skills of strategic communication, such as press management, brand management, advertising, corporate communications, digital communications and events management.

The course explains how organisations and individuals communicate, taking into account the various factions with whom they communicate, and the methods used. You will also focus on the strategies and tactics used in public relations, including the importance of market research techniques, advertising, marketing, as well as online and digital communications. Particular emphasis is placed on press management, along with the role played by public relations in influencing the news agenda and public opinion.

As a result of the Welsh Language (Wales) Measure 2011, along with the growth in the powers devolved to the Welsh Government, there is growing demand for skilled Welsh medium strategic communicators.

By forging a close relationship with various communication practitioners – within the public sector, communications and advertising agencies, private companies and the third sector – you’ll have the opportunity to gain direct experience of the industry in an informal way, as well as the opportunity to spend time undertaking work experience in an exciting location.

After graduating, you could pursue a career as a corporate and professional communicator in various sectors in Wales and beyond.
Art and Design

Art and Design enables students to develop a wide range of artistic skills. You’ll have the opportunity to develop practical skills in 2D and 3D work, digital processes, still and moving images, design and planning, as well as creating work in fine art, craft and design.

Alongside skills in art, you’ll develop skills that you can apply to the workplace, e.g. ability in decision-making, communication, innovation and enterprise.

The subject underlines the importance of combining practical and creative skills. It is based on theoretical ideas that will enable you to reach your creative potential.

Across all Visual Arts subjects, you’ll also have the opportunity to look at Wales’ creative visual cultures within an international context.

As a basis for the practical creative process, you will develop historical and theoretical knowledge, international ideas, an understanding of contemporary art and design, as well as an appreciation of the importance of visual culture.

By following a degree course in Art and Design, there are several career paths open to you, working as one of the following:

- Professional artist
- Community artist
- Artistic manufacturer
- Designer
- Creative practitioner
- Freelancer
- Curator
- Art and design administrator
- Primary or secondary teacher, subject to gaining a PGCE

Or if you wish to continue with your studies, you could follow an MA programme.
Music

Are you a classical, pop or rock performer? Or a composer? Would you like to be an audio engineer or a music teacher? Or would you like to combine several aspects of music as a freelance musician?

Music is one of the widest disciplines offered at university. In pursuing a music course through the medium of Welsh, you will study performing, composing and music history, along with a number of other aspects.

The Coleg Cymraeg Cenedlaethol has supported a large number of exciting developments in music recently, which means the Welsh medium provision in music at Wales’ universities is wider and richer than ever before.

This makes it a great time to be studying music through the medium of Welsh at university!

A music degree course will help you develop a practical, hard-working and dedicated approach to your work. Each university that offers music has its own expertise, but there are some common elements.

Depending which pathway you take, you’ll be able to combine different elements, e.g. music history, composition and performance.

In addition to developing specialist skills, a degree in Music offers many transferable skills in relation to the world of work. If you conduct an ensemble or a choir, you have to work with others and hold effective discussions; in giving oral presentations, you will develop the ability to communicate clearly, and being prepared to take a risk is essential in organising a concert. Many modules also offer a direct link to the professional world via visits to employers along with the opportunity to undertake a period of work experience.

Music students follow a number of different paths after graduation, whether as a television or radio researcher, professional singer, secondary school teacher, audio engineer, independent film maker, or a music project development officer (very often through the medium of Welsh).

Provision through the medium of Welsh in higher education institutions continues to expand, and the Coleg Cymraeg Cenedlaethol lecturers are developing new areas of study through the medium of Welsh, e.g. music in health and welfare, composing for film and the media, the history of popular music, and audio technology.
Would you like to work with young children and their families? Maybe you already work in a school or a nursery, and want to expand your qualifications?

Because of the need to give young people the best possible opportunities, there is a great demand for skilled and confident workers in this area. By studying the subject through the medium of Welsh, you’ll be a great asset to any prospective employer as a result of your ability to offer a Welsh language service to children and families, at a time when there is a clear and growing demand for it.

During the course, you’ll look at early childhood in the context of child development in Wales and across the world, both theoretically and historically, and in current practice. You’ll also have the opportunity to study cultural concepts of childhood, early literacy, outdoor learning, as well as gender. You will also visit a number of locations with links to the field in Wales and beyond.

A degree in Education and Early Childhood Studies will prepare you for the world of work, as you will develop a thorough knowledge of a number of key areas, including sustainability, justice, social inclusion and leadership.

Graduates work in various areas, including:
- the specialist voluntary sector (e.g. Mudiad Meithrin, Kids’ Clubs, Women’s Aid)
  - Teaching
  - Working with the community and families (Flying Start, family centres)
- Social work
- Working in a specialised library (e.g. a toy library)
- Senior management in educational research

Education and Early Childhood Studies
Initial Teacher Training

Could you inspire children and young people? Could you challenge them to broaden their horizons and encourage them to develop into conscientious citizens?

We can all think of a teacher who had a great influence on us during our time at school. We will always be grateful to those individuals for their guidance, their inspiration and their ability to enlighten and challenge us. Without their positive influence, we would not have reached our goals today.

Initial Teacher Training courses will offer you thorough training to become a teacher who will be an inspiration to children and young people.

You will be challenged to expand upon your subject knowledge, to learn a range of different teaching methods, and to observe the best teaching techniques. The training will take place partly at university and partly in the classroom, which happens normally in more than one school.

At a time where the demand for Welsh medium education is increasing, there is a real need for inspirational teachers who are fluent in Welsh, and ready to share their enthusiasm with the younger generation. It is a challenging profession, and the satisfaction experienced as a child reaches milestones in their educational development – whether in reading or writing a piece of work for the first time – is an experience you will never forget.

Studying to be a Teacher

You can train through the medium of Welsh, or both languages, to be a primary or secondary teacher. Further details on the provision can be obtained by contacting the three regional teacher education centres in Wales:

- South West Wales Centre of Teacher Education
- South East Wales Centre for Teacher Education and Training
- North and Mid Wales Centre of Teacher Education

Although there will be some local variations, all courses provided by these centres will be relatively similar in content and structure. There will be an opportunity for fluent Welsh speakers, along with those less confident in the use of Welsh, to attend language improvement courses.

As a rule, students are placed in schools which reflect their ability in the language.
Modern Languages

Studying languages offers many career opportunities and opportunities to study, in Wales and internationally. If you want to learn more about the world and develop an expertise in a specific language, a degree in Modern Languages is ideal for you. Bilingualism – if not trilingualism – is common throughout Europe, and many students who are already bilingual love to study an additional language.

Languages are the key to the new, multilingual world in which we live. Be part of it!

By studying the subject through the medium of Welsh, you’ll be able to study a modern language through the language that comes naturally to you. You’ll gain a deep understanding of the modern language by focusing on linguistic elements alongside a range of exciting modules about literature, society, politics and the economy of countries around the world.

Many graduates go on to look for work abroad, but a number of graduates also take advantage of the opportunities that exist in Wales, pursuing careers in the following areas:

- Technology
- Public sector (e.g. the European Commission, British Council)
- Media
- Event management
- Tourism
- Retail
- Manufacturing
- Law
- Translation
- Interpretation
- Education (secondary school teacher, further higher education, teacher of English as a foreign language in schools)
- Retail purchasing
- Accounting
- Marketing and market research

In recent years, a number of students studying a proportion of their Modern Languages degree through the medium of Welsh have benefitted from attending a residential course with students and lecturers from other universities across Wales. This is a unique opportunity to share experiences and to get to know other people who also enjoy learning about the languages and cultures of foreign countries. As well as lectures on specific topics and sessions on career opportunities, the course is an opportunity to socialise and to compete in the Grammar olympics!
Linguists study languages from a scientific viewpoint. This doesn’t mean you have to speak dozens of languages or pass chemistry exams!

Linguists are interested in the patterns existing within different languages, together with similar patterns between different languages. They also examine how speakers acquire (learn) their languages and use them in society. There is also an applied (or practical) aspect to Linguistics which encompasses a number of areas, including linguistic planning, language policy and language teaching methods.

A number of the modules offered will give a taste of how languages affect public life. This is important for us in Wales since we have two official languages and because there are varying ways of learning Welsh (e.g. at home, in Welsh-medium schools, as adults).

As a Welsh-medium student in Linguistics, you will learn about different aspects of Linguistics generally, and specifically about the linguistic situation of Welsh and bilingualism in Wales. You will learn about theories in the above fields by considering international research into various languages and social contexts.

In addition to the international dimension, you will apply concepts to the Welsh language and the social situation of Welsh-English bilingualism.

Here are some of the Welsh-medium modules offered recently by the School of Linguistics and English Language at Bangor University, and by the School of Welsh, Cardiff University:

- Welsh Linguistics
- History of the Welsh language
- Welsh and society
- Sociolinguistics
- Aspects of bilingualism
- Language Acquisition
- Language planning and language policy

Studying Linguistics will give you an opportunity to refine your analytical skills as well as developing new skills in project management, independent research, summarising scientific work in a meaningful manner, collecting and interpreting quantitative and qualitative data, together with problem solving and communicating complex ideas.

Graduates have obtained posts in many different areas and institutions, including:

- Teaching (in Wales and beyond)
- Computing and informatics
- Translation
- Journalism and the media
- Marketing
- Government and the civil service
- Research

Linguists are also keen to train the next generation of researchers working on the linguistics of Welsh.

By following Welsh-medium modules, you will have an opportunity to develop skills and knowledge about the linguistics of Welsh which will be of advantage should you wish to study further for a postgraduate qualification.
A law degree provides a foothold into many areas, not just the legal profession. It can lead to running a business, management, personnel, local or central government, the police and journalism.

If a career in law does appeal to you, you can go on to specialise in a particular area such as family law, criminal law and internet law. The demand for lawyers who understand Wales and the language is increasing due to the fact that the Welsh Government have more powers and the Welsh Language Measure provides further rights for Welsh speakers.

After graduating you can join a law firm, large or small, and a career as a solicitor will enable you to work in any type of area – rural or urban. You may also, in time, choose to establish your own law firm. There has been an exciting growth in the number of Welsh language modules available in Law.

If you study these, you will have the opportunity to improve your language skills in order to express yourself in both languages. The primary task of a legal mind is to make sense of the complexities of society and its people. In order to reflect today’s dynamic society, the Law modules at the universities change frequently. Some examples of Welsh language modules include Business Law, Europe, human rights and social policy.
Politics

Do you want to be a politician, or do you want to present the counter-argument?
Are you keen to learn more about the political landscape in Wales and the rest of the world?

If so, politics is the perfect degree for you: it will allow you to build a broad understanding of global power. As power moves from Westminster to the Assembly, there is demand for people who understand Wales to work in companies, organisations, charities and the media.

A degree in Politics shows employers that you can analyse, understand and see many sides to an argument. You’ll be introduced to a wide range of ideas and new political concepts that will broaden your horizons. By studying Welsh medium modules on Wales and the world, you’ll be trained to think and write in Welsh in a purposeful and incisive way. You’ll graduate with the ability to handle political issues in both Welsh and English, which will be invaluable when you apply for jobs.

During the course, you’ll have the opportunity to undertake work experience, that could include a period with a politician, a campaigning organisation, or even the Government in Cardiff, London or Brussels. That will allow you to experience the daily excitement of politics in Wales and beyond.

Politics graduates work in many different fields, e.g. political party research, lobbying for companies or organisations, policy development for campaigning organisations or charities, journalism, the civil service and education.
Do you like to analyse things and ask questions? Do you enjoy trying to make sense of different elements, e.g. religion, society and human nature?

If you want to tackle difficult issues and learn how to understand, interpret and develop all sorts of arguments, Philosophy is the subject for you.

The main essence of Philosophy is getting to grips with understanding and critically evaluating the reasons and assumptions that underpin our daily ideas.

In developing this skill, you will also learn how to deal with arguments and communicate them articulately and clearly, which will be of great benefit to you in the world of work.

In an increasingly competitive professional world, the ability to reason, analyse and think astutely will put you one step ahead of the competition for any job. In addition, the ability to discuss and work through the medium of Welsh will be another string to your bow.

Studying Philosophy can prepare you for a number of career paths, be it journalism, the media, film and television, the civil service, law, advertising, marketing, management, teaching and further research, or even a career in industry.
If you’re interested in the problems and challenges of society (whether this is dealing with offenders, developing health policy, childcare, housing policy or language schemes), Social Science and Social Policy is the course for you.

In Wales, there is a demand for people who can tackle the problems of society. Studying a Social Science degree or modules will open your eyes to the society we belong to and ways that we can further develop it.

As part of the course, you will explore policy related to the welfare system, health promotion, housing as well as the justice system. You will also have valuable and challenging experiences in this area of work with employers such as the Government, Police and the voluntary sector.

The Welsh Government delivers unique Health and Social Policy for Wales and there is an increasing emphasis on rights for Welsh speakers. This means that there is a demand for employees who understand Welsh society and can work bilingually.

Gaining a degree in Social Science and Social Policy will allow you to work in a variety of fields, including social care, local government, Welsh Government, the Police and the legal system, the health service and older people’s care, education and childcare, youth work as well as developments in terms of the Welsh language.
Criminology and Police Studies

Studying Criminology opens the door to diverse career options. It will encourage you to think critically and independently and will give you the opportunity to develop skills in order to analyse and understand our varied society. Criminology combines intellectual and practical elements.

Studying Welsh medium Criminology modules will ensure that you not only get to grips with the complexities of society in Wales but will also be able to provide services to future employers in both languages.

During the course you will gain practical experience, and as the probation service in Wales becomes more distinctively Welsh (with increasing differences between it and the probation service in England) there will be a demand for students who recognise the needs of society in Wales. You will also combine your studies on the Welsh context with international criminology; you will have an opportunity to look at situations abroad that will prepare you for work outside the UK if you so wish.

Criminology includes elements from other disciplines such as Law, Social Sciences and Police Science, and similarly it is possible to study Criminology modules within these subjects.

In studying Welsh medium modules in a degree course or a joint degree in Criminology, you will be qualified to apply for jobs in a variety of areas:

- The probation service and the police
- Prisons and the Crown Prosecution Service
- Work with young people and people on probation
- Working in Government policy or local government
- Further studies in Law
Are you interested in a career in sport? Would you like to work towards promoting physical health in the community or teach and coach outdoor activities? Or maybe you aspire to work with Olympians in analysing technique and tactics? Without doubt, a Sports degree can offer you the opportunity to develop the knowledge, skills and expertise that will prepare you for an exciting and busy career. During your course, you will experience various international projects and experiences.

In studying part of your course through the medium of Welsh, you will develop the ability to deal with Sport Science in both languages, that will be very useful in applying for jobs in a very competitive market. With the increasing demand for Welsh language skills in both the public and private sector in Wales (especially in coaching, teaching, scientific support and promotion), your skills will be of advantage to employers in those areas.

You will be able to study the following through the medium of Welsh:
- Coaching
- Teaching outdoor activities
- Teaching Physical Education
- Sports management and development
- Sport Sciences
- Ethics
- Sport Psychology
- Health and training

A number of students graduating in Sport Science go on to careers not only as coaches, health promoters and managers, but also to other areas where the ability to use Welsh is invaluable, including physiology, science, psychology, education and journalism.
Are you interested in business? Do you want to set up your own business? Or do you want a career working for companies in a wide variety of areas, from marketing and selling to human resources and financial firms? Do you want to understand what is influencing the current economic changes?

Studying Business through the medium of Welsh offers all kinds of benefits. In the private and public sectors in Wales, the need for Welsh language skills is increasing, especially in marketing, human resources and management where there is more and more demand for businesses to provide services through the medium of Welsh.

By studying part of your course through the medium of Welsh, you will learn how to handle the subject in both languages, which will be a great asset to you when applying for jobs. You will also be prepared for the world of work by learning a number of other skills too, e.g. the ability to communicate, to work in a team, as well as problem-solving skills.

Studying Economics will allow you to make better decisions as an individual, company or as part of the Government. You will also have the opportunity to meet a number of business people and to undertake work experience.

There are many careers open to Business graduates, including marketing, events management, human resource management, tourism management, management of hotels and shops, the civil service, local government, accounting, a career stemming from public sector policies, or even setting up a business.

Business Studies
Nursing and Midwifery

Nursing is an exciting and challenging career which demands a number of qualities: commitment, people skills, patience and understanding (not to mention a sense of humour!). This is your chance to make a difference to patients’ lives.

The functions of a nurse are very wide-ranging, and providing tender care through difficult times is a key element.

Courses are offered in Nursing in four areas in Wales, namely adult nursing, mental health nursing, nursing children and young people, and learning disability nursing. Whichever area you wish to study, it’s essential that you learn how to deal with the physical, mental and emotional needs of each patient with respect and dignity.

Each course is split equally between theory and clinical practice, which means that each piece of work carried out under supervision in the clinical area is supported by academic study. You will undertake a number of clinical work placements and will receive the support of a clinical mentor in the workplace.

You will have the opportunity to foster clinical skills in hospital and in the community, in the health sector and in independent sector institutions, where you will deal with a wide range of health problems or needs presented by patients from all kinds of cultural and linguistic backgrounds. You will also have a chance to learn and practice many clinical skills in simulation rooms, which will support your learning and prepare you for clinical placement and practice.

If you would like to study Midwifery, you will study the following as part of the course:

- Anatomy and Physiology
- Pre-conception care
- Detailed study of ante-natal care
- Care during birth
- Post-natal care
- Public health
- Sexual health
- Contraception
- Detailed study of new-borns

All these courses have been validated by the Nursing and Midwifery Council.

After graduating, you may register as a nurse with this body.
Medicine

The provision and developments in the teaching of Medicine through the medium of Welsh are geared towards attracting, training and retaining good doctors in Wales. Ensuring an awareness of the importance of the Welsh language in healthcare is a vital part of all students’ medical training as they learn about the differences between being a doctor in Wales and the rest of the UK.

According to the Welsh Government’s strategy, ‘More than Just Words/ Mwy na Geiriau’ (2012): “It is important to recognise that many people can only communicate their care effectively through the medium of Welsh.”

Developing and extending opportunities for students to study and practice Medicine through the medium of Welsh is an intrinsic part of improving the quality of healthcare in Wales and for Welsh speakers in particular. The medical curriculum is a combination of teaching core information together with providing students with experience in a variety of clinical settings, and a range of learning methods are provided including tutorials, lectures and practical sessions.

The chief aim of a degree in Medicine is to meet patient need, and a core part of the course is the opportunity to communicate and interact with patients in clinical settings with a variety of experiences offered in hospitals, community medical centres and surgeries across Wales. Students have the opportunity to complete placements through the medium of Welsh wherever possible.

For medical students, studying Medicine through the medium of Welsh is an advantage in preparation for the workplace. In the context of the medical profession, the Welsh language is part of a wider picture, where an awareness of the linguistic needs of patients is part of the daily challenge. In light of this, the medic who can communicate fully with patients in both languages is prepared for the global challenges facing the profession.
Health Sciences

Wales is home to some of the UK’s most popular schools of Healthcare Sciences, offering a wide choice of degrees and higher education certificates of the highest standard. In addition, the research and clinical opportunities offered are amongst the best in the world.

As a health professional, a significant part of your work will be communicating with the public and colleagues. By studying part of your course through the medium of Welsh you will have the opportunity to develop your communication skills to enable you to work bilingually, increasing your workplace opportunities and giving patients the chance to receive treatment through the medium of Welsh if they wish.

A wide range of subjects are available to study at university:

- Physiotherapy
- Occupational therapy
- Speech therapy
- Operating department practice
- Dietetics
- Diagnostic radiography
- Radiotherapy and Oncology

During your studies, you will have the chance to experience interesting educational approaches, e.g. clinical problem based learning. You will also have the opportunity to learn in virtual laboratories that recreate the hospital ward and clinic as well as the intensive care and surgical departments. Lectures and tutorials are held for all the health subjects as part of a multi-professional course and you will have the opportunity to work alongside NHS staff, in addition to working in community based settings.

The NHS is Wales’ largest employer, employing over 70,000 members of staff. If you want to work for this organisation after graduating you will be part of a large team of professionals who work together to provide healthcare in hospitals and in the community for over three million people in Wales. The NHS works with social services and third sector organisations, and a wide range of opportunities exist for health professionals in the private sector, the third sector and in social services, together with schools, prisons, politics, research and sport.

A career as a health professional will offer daily challenges as well as satisfaction and the opportunity to develop skills and knowledge.

If you would like a challenging, interesting and varied career, take a look at the health courses available in Wales and join a wide-ranging team of multi-talented professionals.
A professional career in Psychology is varied and interesting, and with the skills you will develop during your degree you will also be qualified to work in a variety of areas. During the course, you will benefit from the expertise of the lecturers who are dedicated to offering the best possible experience in studying Psychology, and you will also have the opportunity to meet fellow students from all over the world.

In studying your course – or parts of it – through the medium of Welsh, you will be taking a significant step towards preparing for your career.

There is strong evidence in Wales of the importance of being able to communicate bilingually when applying for jobs. For instance, key employers such as the NHS and councils want to employ professional psychologists who can communicate with clients, patients and colleagues in Welsh. As a result, the fact that you have studied through the medium of Welsh will be valuable for your CV.

Psychology graduates can work in a number of different areas, including:
- Educational and clinical psychology
- Sport
- Occupational fields of work
- Academia
- Health
- Counselling
- Health psychology

Other popular career choices include market research, human resources, education and advertising.
Social Work

Being a social worker demands wide-ranging knowledge and particular skills for working with some of society’s most vulnerable individuals. Consequently, those who want to work in this area require professional training.

During the Social Work degree programmes, academic and professional elements are drawn together in order to prepare students for jobs within the social care workforce. In addition to gaining a recognised educational qualification, you will also gain the registration required to work professionally.

In social care, it is vital that any vulnerable individual has the opportunity to express their most personal feelings and experiences in their first language. It is only through ensuring that every opportunity is given to the individual to express themselves – and be understood in their language of choice – that the appropriate care, support and service can be arranged for them.

A number of social work programmes offer training through undergraduate and postgraduate courses. Some offer certain elements of study through the medium of Welsh and you can study the complete postgraduate Social Work programme through the medium of Welsh at Bangor University.

You will have an opportunity to study a variety of modules, including values and ethics, social work law, working with children and families and working with adults with different needs.

A significant proportion of the programmes offer opportunities for students to experience the practical side of social work in different settings such as social services departments, third sector organisations and the private sector.
Cardiff University’s Welsh-medium provision at the School of Pharmacy and Pharmaceutical Studies is working towards strengthening Welsh pharmaceutical services in Wales.

Continuing to expand and develop this provision is not only essential in order to raise awareness among future pharmacists of the importance of the Welsh language in the field of health in Wales, but also in order to ensure that our services are in the vanguard as regards meeting the care needs of Welsh speakers and their families or carers.

“The purpose of health and social care services is to care for people as individuals... People’s cultural identity and their linguistic needs must be core to this because it is an essential element of good quality care and high professional standards.”

More than Words – A Strategic Framework for Welsh Language Services in Health

The chief focus of Pharmacy is patients’ needs, and the degree is formulated to reflect this. The curriculum includes core scientific and therapeutic subjects aligned with clinical practice. We use a range of teaching methods including lectures, tutorials and practical sessions.

During the course, what you learn will be put to practical use on placement; in the community, in hospital and in a number of other locations. This opportunity to communicate and interact with patients and different professions is an essential part of learning, and reflects the profession and what is required of it. You will have an opportunity to complete placement periods through the medium of Welsh when this is possible.

As a prospective pharmacist, the opportunity to study elements of the course through the medium of Welsh will be most advantageous.

The ability to operate fully bilingually in a professional context not only improves your career prospects, but also answers the requirements of the health service by ensuring that patients receive the very best treatment.

At Cardiff University, a four-year MPharm degree is offered. The degree is accredited by the Pharmaceutical Council as a valid route into the profession. The School of Pharmacy is undoubtedly one of the best in the UK and regularly heads national league tables. Thus, a good academic degree and the school’s reputation ensure that our students are very popular with employers.
Language and Speech Therapy

Language and speech therapists provide treatment and support for children and adults who have communication difficulties or have problems with eating, drinking or swallowing. This is a treatment which can transform lives.

They are professional workers in the health-related field and co-operate closely with parents, carers and other professionals such as teachers, nurses, occupational therapists and doctors.

This course will enable you to gain the necessary qualifications for this exciting profession. The course involves a combination of academic work and practical work. Developing the ability to apply theoretical knowledge to clinical observation and practice is an essential part of training as a speech and language therapist.

The curriculum is wide-ranging, with the following core elements included in the course:

- Linguistics
- Phonetics
- Biological sciences
- Psychology
- Speech and language pathology

In order to ensure that Welsh-speaking individuals who have communication difficulties can access treatment in Welsh, it is essential to attract students who can speak Welsh into the profession.

As the only course in Wales, Cardiff Metropolitan University offers innovative provision which ensures a range of Welsh-medium opportunities.

The provision includes lectures, tutorials and practical sessions and pastoral support, in addition to the opportunity of completing a research project based on the Welsh language should you so wish. Clinical placements are an essential part of the course, and there will be a range of experiences in clinics, hospitals, schools and specialist centres across Wales.

Students can complete periods of placement through the medium of Welsh when this is possible. By studying parts of the course through the medium of Welsh, you will have an opportunity to develop the knowledge and skills necessary to work in Welsh as well as in English. This will ensure that graduates joining the profession can offer care of the highest quality by communicating in the language most suitable for the situation.

There will be an opportunity to discuss factors which are important when undertaking clinical work with a bilingual population, together with what is different for a therapist working in Wales as compared with the rest of the UK. You will have a unique insight into other bilingual situations in the UK and many other countries, which forms part of the profession’s global landscape.
With the growth in world population alongside the need to ensure the highest quality food supply, it is more important than ever that farmers receive a first class education.

Ensuring the availability of nutritious milk and meat in the future is vital, as well as complying with conservation and sustainability requirements.

In studying a course in Agriculture, you’ll also learn a number of important principles such as soil and grassland management, crop management and production, animal production as well as sustainability.

If you are interested in a more vocational course, the Foundation degree in Agriculture or Agriculture and Countryside Management will appeal to you. This is a unique opportunity to develop skills in husbandry and management, and to gain practical experience that will pave the way to a career in agriculture, countryside management and conservation. These courses are also popular among those who wish to retrain or change career.

The food and farming sector is key to the Welsh economy in terms of employment and its contribution to tourism.

The supply chain represents around 18% of the Welsh workforce. According to a Welsh Government report on Welsh language skills, 45% of agri-food sector employers considered Welsh language skills as important to their business, and a third considered Welsh language skills as very important.

The same report shows that Welsh is used in the workplace in almost 50% of agri-food sector organisations. This naturally means that studying through the medium of Welsh will empower you with language skills crucial to this sector.

Graduates of Agriculture and Countryside Management work in many different areas, including farm management, animal feed, agricultural-environmental consultancy, the provision of sustainable food, farm animal health and welfare inspection, agricultural goods supply, as well as habitat protection and conservation.
Geography

Geography is a wide subject area. It is no surprise therefore that it attracts individuals equally as far-reaching with a breadth of vision. Where else would you get the opportunity to use the most innovative technology in order to learn about the earth’s primitive structure processes, such as the evolution of land-forms and natural disasters? Where else would you also have the opportunity to learn about human relationships and activities which are at the heart of our understanding of the world around us?

You will have the opportunity, while studying the subject, to learn about current issues from around the world under the guidance of experts in their fields. You will follow modules that deal with current issues such as globalisation and current social relations, sustainability, world processes and human responses to natural risks.

In addition to traditional lectures, you will take part in detailed discussions in small groups (tutorials and seminars), develop the ability to work as part of a team by undertaking group work and presentations, as well as develop skills to work independently by planning a research project. You will also be given the opportunity to practice your skills directly by going on work experience, and attending field trips to interesting places such as the Gower Peninsula, and even New York or Vancouver.

While taking advantage of all these opportunities, and doing so through the medium of Welsh, you will develop an infrastructure of skills that will be invaluable in whatever career you choose in the future. The ability to deal with the subject through the medium of Welsh as well as English will be an additional feather in your cap, and an attractive skill to any prospective employer.

A degree in Geography is an excellent starting point for a range of careers, whether in the public sector, the private sector or various other fields. Many graduates go on to work as road and traffic system planners, in the energy and environment sector with the National Parks, Government statisticians, geological surveyors for oil and gas companies, fashion buyers, explorers, film and documentary producers, journalists, charity workers in foreign countries, as well as academic researchers (who work on some of the most interesting and influential matters of our time).
Interested in the environment? Keen to learn more about natural processes and the relationship between them? Want to see Welsh businesses’ environmental performance improve?

If so, a degree in Environmental Science is ideal for you.

Environmental Science is a wide-ranging discipline and you will be studying modern day threats to the world and its people such as climate change, pollution, conservation and food safety. In studying the subject you will have a strong foundation in Biology, Chemistry, Geology and Marine Sciences together with a strong awareness of the relationship between these elements and their effect on mankind.

During the course you will have a number of opportunities to meet with members of the environmental sector workforce, as well as the opportunity to undertake work experience.

Working within the sector you will work with the environmental industries (e.g. agriculture, water, tourism), where statutory bodies expect staff to be able to use both Welsh and English equally. By studying part of your course through the medium of Welsh, you will gain the confidence to present environmental issues in both languages that will be advantageous to you as you pursue your career.

Grades in this field can be found working in a number of different disciplines such as conservation and protection of habitats, environmental consultation, developing and implementing policy, water quality monitoring together with waste management.
Biosciences

Biosciences offer a unique opportunity to understand how the world around us works. What effect will climate change have on our environment? How much of our genetic make-up is similar to that of a monkey or a banana?

Biosciences is based on research and experiments in a laboratory and in the field. Together with expanding your scientific knowledge and understanding of standard scientific techniques, you will also have an opportunity to develop transferable skills in statistics, communication and presentation methods together with organisational skills (as an individual and as part of a group).

In addition to traditional lectures, you will also learn about biosciences through participation in tutorials and seminars, together with developing the ability to work independently through a research project. In some universities you will have an opportunity to undertake work experience as well as go on field trips to sites around the world.

In studying Biosciences through the medium of Welsh you will be able to benefit from developing an invaluable skill set for whatever career you choose.

In Wales, employers linked to Biosciences acknowledge the importance of effective communication in Welsh and English. This is particularly true in jobs where communicating with the public is an essential part of the work; in the environment (with landowners, farmers and horticulturalists) and hospitals (with patients, adults and children).
Mathematics

Mathematics is a very broad subject; it is a language in itself, and is used in a wide range of scientific fields, e.g. Physics and Engineering.

In studying Mathematics, you can specialise in aspects of the subject, such as Statistics, Applied Mathematics, Pure Mathematics or operational research, or you can study any combinations of these. With a view to further enhancing your learning experience, some universities offer opportunities to work in industry, or abroad, for a year.

The first two years of Math and BSc courses are usually the same, and there will be an opportunity to transfer from one scheme to another if you wish.

It is true to say that Maths graduates are likely to receive the highest salaries, second only to Medicine and Dentistry graduates. There is an increasing demand for Mathematics graduates, and the importance of STEM skills (Science, Technology, Engineering and Mathematics) is recognised in the Welsh Government science agenda, ‘Science for Wales.’

A degree in Mathematics can prepare you for a brilliant career, and Maths graduates can be found working in various fields, whether as researchers, engineers, programmers, accountants or teachers. Even if you choose to work in another area after graduating, your skills in analysing, problem solving and critical thinking, along with your practical, computer and communications skills, will be an asset to you in whatever career you choose.

Elements of Mathematics degree courses are taught through the medium of Welsh in more than one university. The ability to discuss and work in both languages is vital in communicating in Wales, and studying elements of a Mathematics degree course through the medium of Welsh will give you a golden opportunity to develop the necessary language skills.
Chemistry

Not every Chemist wears a white coat! A degree in Chemistry can lead to a distinguished career in many fields.

Studying Chemistry through the medium of Welsh offers many advantages. It eases the jump between A Level and university education since discussing a subject through a first language rather than a second is much easier. By studying part of the course through the medium of Welsh, you will have the ability to discuss and write in both languages.

In addition to studying Core Chemistry from practical and theoretical points of view, there is an emphasis on transferable skills, such as communication, dealing with numbers, analysis, handling data, observation, team working and thinking logically. These will be beneficial, whatever career you pursue after graduating.

Chemistry graduates work in a number of different areas and locations, including:
- Industry
- Research
- Computing
- Marketing
- Accounting
- Journalism
- Pharmaceutical companies
- Commercial analysis laboratories
- Forensic science
- Archaeology
- Food technology
- Biotechnology
- Metallurgy companies
Physics

Physics is an exciting subject that offers students a host of experiences by combining the theoretical and the practical. Physics degree courses provide a strong foundation to understand and explain the world around us, Physics laws are the foundation of modern technology, and are used to describe systems, from small subatomic particles to massive galaxies.

Physics is a STEM subject (Science, Technology, Engineering and Mathematics, which are recognised as central to Wales’s economic prosperity).

Physics is highly valued in a variety of fields, such as meteorology, medicine, engineering, computing and digital sectors, communication, journalism and renewable energy sector.

There are many opportunities for Physics graduates. Even if you choose to leave the field after graduating, the skills that you will develop during the course – computer skills, analytical and communication skills, and the ability to think critically and solve problems – will be invaluable, whatever path you take.

It goes without saying therefore that a Physics degree will open many doors. Some Physics graduates go on to study Law and become Patent experts, for example.

A variety of Physics degree schemes are offered. There are three year BSc degree schemes, and four year MPhys degree schemes (which includes more challenging material). There is also a four year BSc Physics degree scheme with a foundation year for those who have no background of studying Physics at A Level in school.

Elements of Physics degree courses are taught through the medium of Welsh. These bilingual degree schemes will give you the opportunity to use both languages to deal with physics, which will prepare you for the professional landscape in Wales and the international arena.

If you are interested in working abroad, you will also have opportunities to do so as part of the degree course.
Computer Science

These days, computers are an ever-present part of our lives. From mobile apps and social media to video games and autopilot, new technologies require reliable and secure software that is also easy to use.

By studying Computer Science, you will develop the skills needed to understand and develop such systems. As a result, you will see doors opening to careers in industry and research.

Computer Science can be studied as a single honours degree or as a joint honours. There are also opportunities to spend a year in industry or even abroad if you wish.

Having the opportunity to discuss your course through the medium of Welsh is a huge boost to learning; by working on innovative projects in groups and as an individual, your ability to discuss and work in Welsh will be of great benefit when working with local industrial companies and consultants.

Computing graduates can be found working in many exciting areas, such as formula 1, aviation, games development and meteorology. Other examples of potential jobs in the field include software developer, information technology officer, research assistant, software engineer and web designer. As you can see, there are plenty of possibilities.
Engineering

Are you a person who likes to solve problems? Do you possess excellent analytical and mathematical skills? Do you want the opportunity to change the way we live? Are you fascinated by the way things work? Are you creative? And do you want to use and develop these skills in order to pursue a successful and challenging career?

If you are, then a degree in Engineering is the right choice for you!

Engineering is a wide and varied subject with an international demand for specialist graduates. It is an area that has been identified by the Welsh Government as a key area for the economic prosperity of Wales.

The areas that can be studied include:
- Aerospace Engineering
- Chemical Engineering
- Civil Engineering
- Materials Engineering
- Computer Engineering
- Electronic and Electrical Engineering
- Environmental Engineering
- Mechanical Engineering
- Medical Engineering
- Sports Engineering
- Nanotechnology
- Product Design

Engineering offers a diverse and exciting career path for graduates, with job security and good pay. Among the sectors that engineers can work are in the industry, business, health, education and research. A number of university courses offer students the opportunity to work with local businesses and industries thus students can benefit from their expertise and develop skills in preparation for a career in the field. Some courses also offer the opportunity to spend a year in industry, or even abroad.

The ability to communicate and work through the medium of Welsh is an additional skill in a competitive field that develops daily. By studying part of your course through the medium of Welsh, you will learn how to handle your subject in two languages – a valuable skill when you apply for jobs.

A degree in Engineering gives you the chance to work in ground-breaking areas, shaping the way people around the world live, improve living standards and improve our understanding of the world around us. It is an area that prepares you for a career that can offer considerable satisfaction!
